

Future Earth  
International Co-Design Workshop  
**Earth Observation in  
Support of the  
Sustainable  
Development Goals**  
– The Case of Urban Areas in Asia

**2017.01.16-18** Tokyo

09:30-17:30 (Registration starts at 09:00)

**Venue**

16-17 Jan: Science Council of Japan

18 Jan: The University of Tokyo

**Language:** English

**Registration Fee:** Free

*The international event will explore how scientists can link satellite and on-the-ground data on the Earth to socioeconomic data to support the implementation of global targets for sustainability.*

Hosting a workshop in order to assess the type of research needed to use Earth Observation data integrated with socio-economic data and in-situ measurements in support to the United Nations' Sustainable Development Goals – with a focus on the challenges affecting urban areas in Asia (natural disasters, climate change, air pollution, etc.)
